ABOUT ME

Final Year Student at Faculty of Electronics passionate about artificial intelligence, cloud computing and focused on finding solutions to important day to day challenges.

WORK EXPERIENCE

DEVOPS ENGINEER – METAMINDS – 07/2025 – 09/2025 – BUCHAREST, ROMANIA

- Setting up and maintaining development, test and production environments
- Managing CI/CD processes
- Working on monitoring and automation with the help of Back-end Developer and Platform Engineer
- Contributing to infrastructure architecture (cloud)
- Integrating deployment solutions with Podman

WORKING STUDENT – NXP – 10/2024 – 04/2025 – BUCHAREST, ROMANIA

Hands-on project in collaboration with NXP Semiconductors

- Developed core automotive functionalities (braking, lighting, transmission, steering) on the S32K144 microcontroller.
- Programmed in S32 Design Studio using low-level hardware access and direct register control.
- Collaborated in a team to simulate and test vehicle features in a real-time embedded environment.

ENGINEERING INTERN – NATIONAL AUTHORITY FOR COMMUNICATION ADMINISTRATION AND REGULATION – 07/2023 – 08/2023 – BUCHAREST, ROMANIA

The Official Internship Program of Romanian Government

- understanding the national administrative system and working procedure;
- collection, completion and updating activities in the electronic records of data related to suppliers;
- detection of non-compliant radio equipment using spectrometers;
- monitoring the radio frequency spectrum with non-governmental use;

EDUCATION AND TRAINING

10/2022 – CURRENT Bucharest, Romania

ENGINEERING DIPLOMA University Politehnica of Bucharest

Consistently ranked in the **top 9%** of the cohort and awarded a **Merit Scholarship** for academic excellence.

Field of study Applied Electronics, Computer Science

LANGUAGE SKILLS

Mother tongue(s): **ROMANIAN**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C1	C1	C1
GERMAN	B1	B1	A2	A2	A2
ITALIAN	A2	A2	A2	A2	A2

PROJECTS

My Website

[This website](#) highlights my accomplishments and expertise across ML & AI, circuit design, web development and more:

- Machine learning projects include predictive models and classification systems;
- Artificial Intelligence projects that contain deep research on Neural Networks, real-time Computer Vision and a lot more;
- Circuit design projects that cover both digital and analog circuits, emphasizing efficient hardware solutions;
- Web Development projects that have their whole lifecycle created and maintained (DevOps + Full Stack Development);

BlindAid

[BlindAid](#) is a computer vision project using Artificial Intelligence that serves to:

- Assist visually impaired individuals in navigating their surroundings;
- Alert the individuals about obstacles and inform them of their immediate location

The system captures visual input, processes it to detect depth, and converts that information into audio feedback.

CERTIFICATIONS

List of Certifications

- ECDL – European Computer Driving Licence
- IBM – Python for Data Science, AI & Development
- Cisco - CyberOps Associate
- In progress: Cisco CCNA1 & 2;

VOLUNTEERING

10/2022 – CURRENT Bucharest

Member of League of Electronic Students

- The League of Electronic Students (LSE) is the student organization of the Faculty of Electronics, Telecommunications and Information Technology, representing student interests and supporting both academic and personal-professional development in the technical field.
- Being a student tutor and helping younger students towards a better academical experience.
- Organizer of events such as "Alearga pentru viata" in the position of Lead of logistics, by providing visual information and directions to the participants.
